Executive Summary

Summary of methodologies

1. Data Collection:
2. Data Preprocessing:
3. Exploratory Data Analysis (EDA):
4. Feature Engineering:
5. Model Selection:
6. Model Training:
7. Model Evaluation:

Summary of all results

・Developed predictive models to forecast the success or failure of future SpaceX launches based on historical data, achieving a high level of accuracy and reliability. Utilized machine learning

・algorithms such as logistic regression and random forests to predict launch outcomes and assess the likelihood of mission success.

Introduction

Project background and context

- Analyzing SpaceX data to understand its launch history and mission outcomes.
- Investigating the impact of SpaceX innovations on the space industry.
- Using data science to explore opportunities for future space exploration endeavors.

Problems you want to find answers

- Understanding factors contributing to the success or failure of SpaceX launches.
- Identifying trends and patterns in launch data to inform decision-making and improve mission planning.

Section 1

Methodology

Methodology

Executive Summary

- Data collection methodology:
  - Accessing SpaceX data using the SpaceX API.
  - Retrieving information about launches, rockets, payloads, and other relevant data.
- Perform data wrangling
  - Cleaning and formatting the retrieved data. Handling missing values, duplicates, and outliers. Transforming data into a suitable format for analysis.
- Perform exploratory data analysis (EDA) using visualization and SQL
- Perform interactive visual analytics using Folium and Plotly Dash
- Perform predictive analysis using classification models
  - Create classification models with algorithms like logistic regression, decision trees, or random forests, fine-tune parameters, and evaluate accuracy using metrics such as accuracy and F1-score.

Data Collection

Access Data Sources

Utilize APIs to access real-time data from SpaceX, ensuring up-to-date information on launches, rockets, and payloads.

Data Cleaning and Preprocessing

Perform data cleaning to remove duplicates, handle missing values, and address inconsistencies in the dataset.

Data Integration

Merge and integrate multiple datasets obtained from different sources to create a unified dataset for analysis.

Data Validation

Validate the integrity and accuracy of the collected data by cross-referencing with trusted sources and performing data quality checks.

Data Collection – SpaceX API

1.Identify SpaceX API Endpoints:
- Identify relevant endpoints provided by the SpaceX API, such as `/launches`, `/rockets`, `/payloads`, etc.

2.Define Query Parameters:
- Specify query parameters such as date range, launch status, rocket type, etc., to retrieve specific subsets of data.

3.Perform REST Calls:
- Use HTTP GET requests to access data from SpaceX API endpoints.
- Include query parameters in the requests to filter and customize the retrieved data.

4.Handle Pagination:
- Handle pagination if the API responses are paginated by iterating through multiple pages of results using pagination parameters.

5.Retrieve Data:
- Extract relevant data fields from the API responses, including launch details, rocket specifications, payload information, etc.

6.Data Processing:
- Process the retrieved data to convert it into a structured format suitable for analysis.
- Perform data cleaning, preprocessing, and transformation as necessary to ensure data quality and consistency.

7.Data Storage:
- Store the processed data in a suitable format, such as CSV files, databases, or dataframes, for further analysis and exploration.

Yuki Nakayama 1st,MAR,2024

Data Collection - Scraping

- Present your web scraping process using key phrases and flowcharts
- Add the GitHub URL of the completed web scraping notebook, as an external reference and peer-review purpose

in process

Place your flowchart of web scraping here

Yuki Nakayama 1st,MAR,2024

Data Wrangling

- Describe how data were processed
- You need to present your data wrangling process using key phrases and flowcharts
- Add the GitHub URL of your completed data wrangling related notebooks, as an external reference and peer-review purpose

EDA with Data Visualization

- Summarize what charts were plotted and why you used those charts
- Add the GitHub URL of your completed EDA with data visualization notebook, as an external reference and peer-review purpose

EDA with SQL

- Using bullet point format, summarize the SQL queries you performed
- Add the GitHub URL of your completed EDA with SQL notebook, as an external reference and peer-review purpose

Build an Interactive Map with Folium

- Summarize what map objects such as markers, circles, lines, etc. you created and added to a folium map
- Explain why you added those objects
- Add the GitHub URL of your completed interactive map with Folium map, as an external reference and peer-review purpose

Build a Dashboard with Plotly Dash

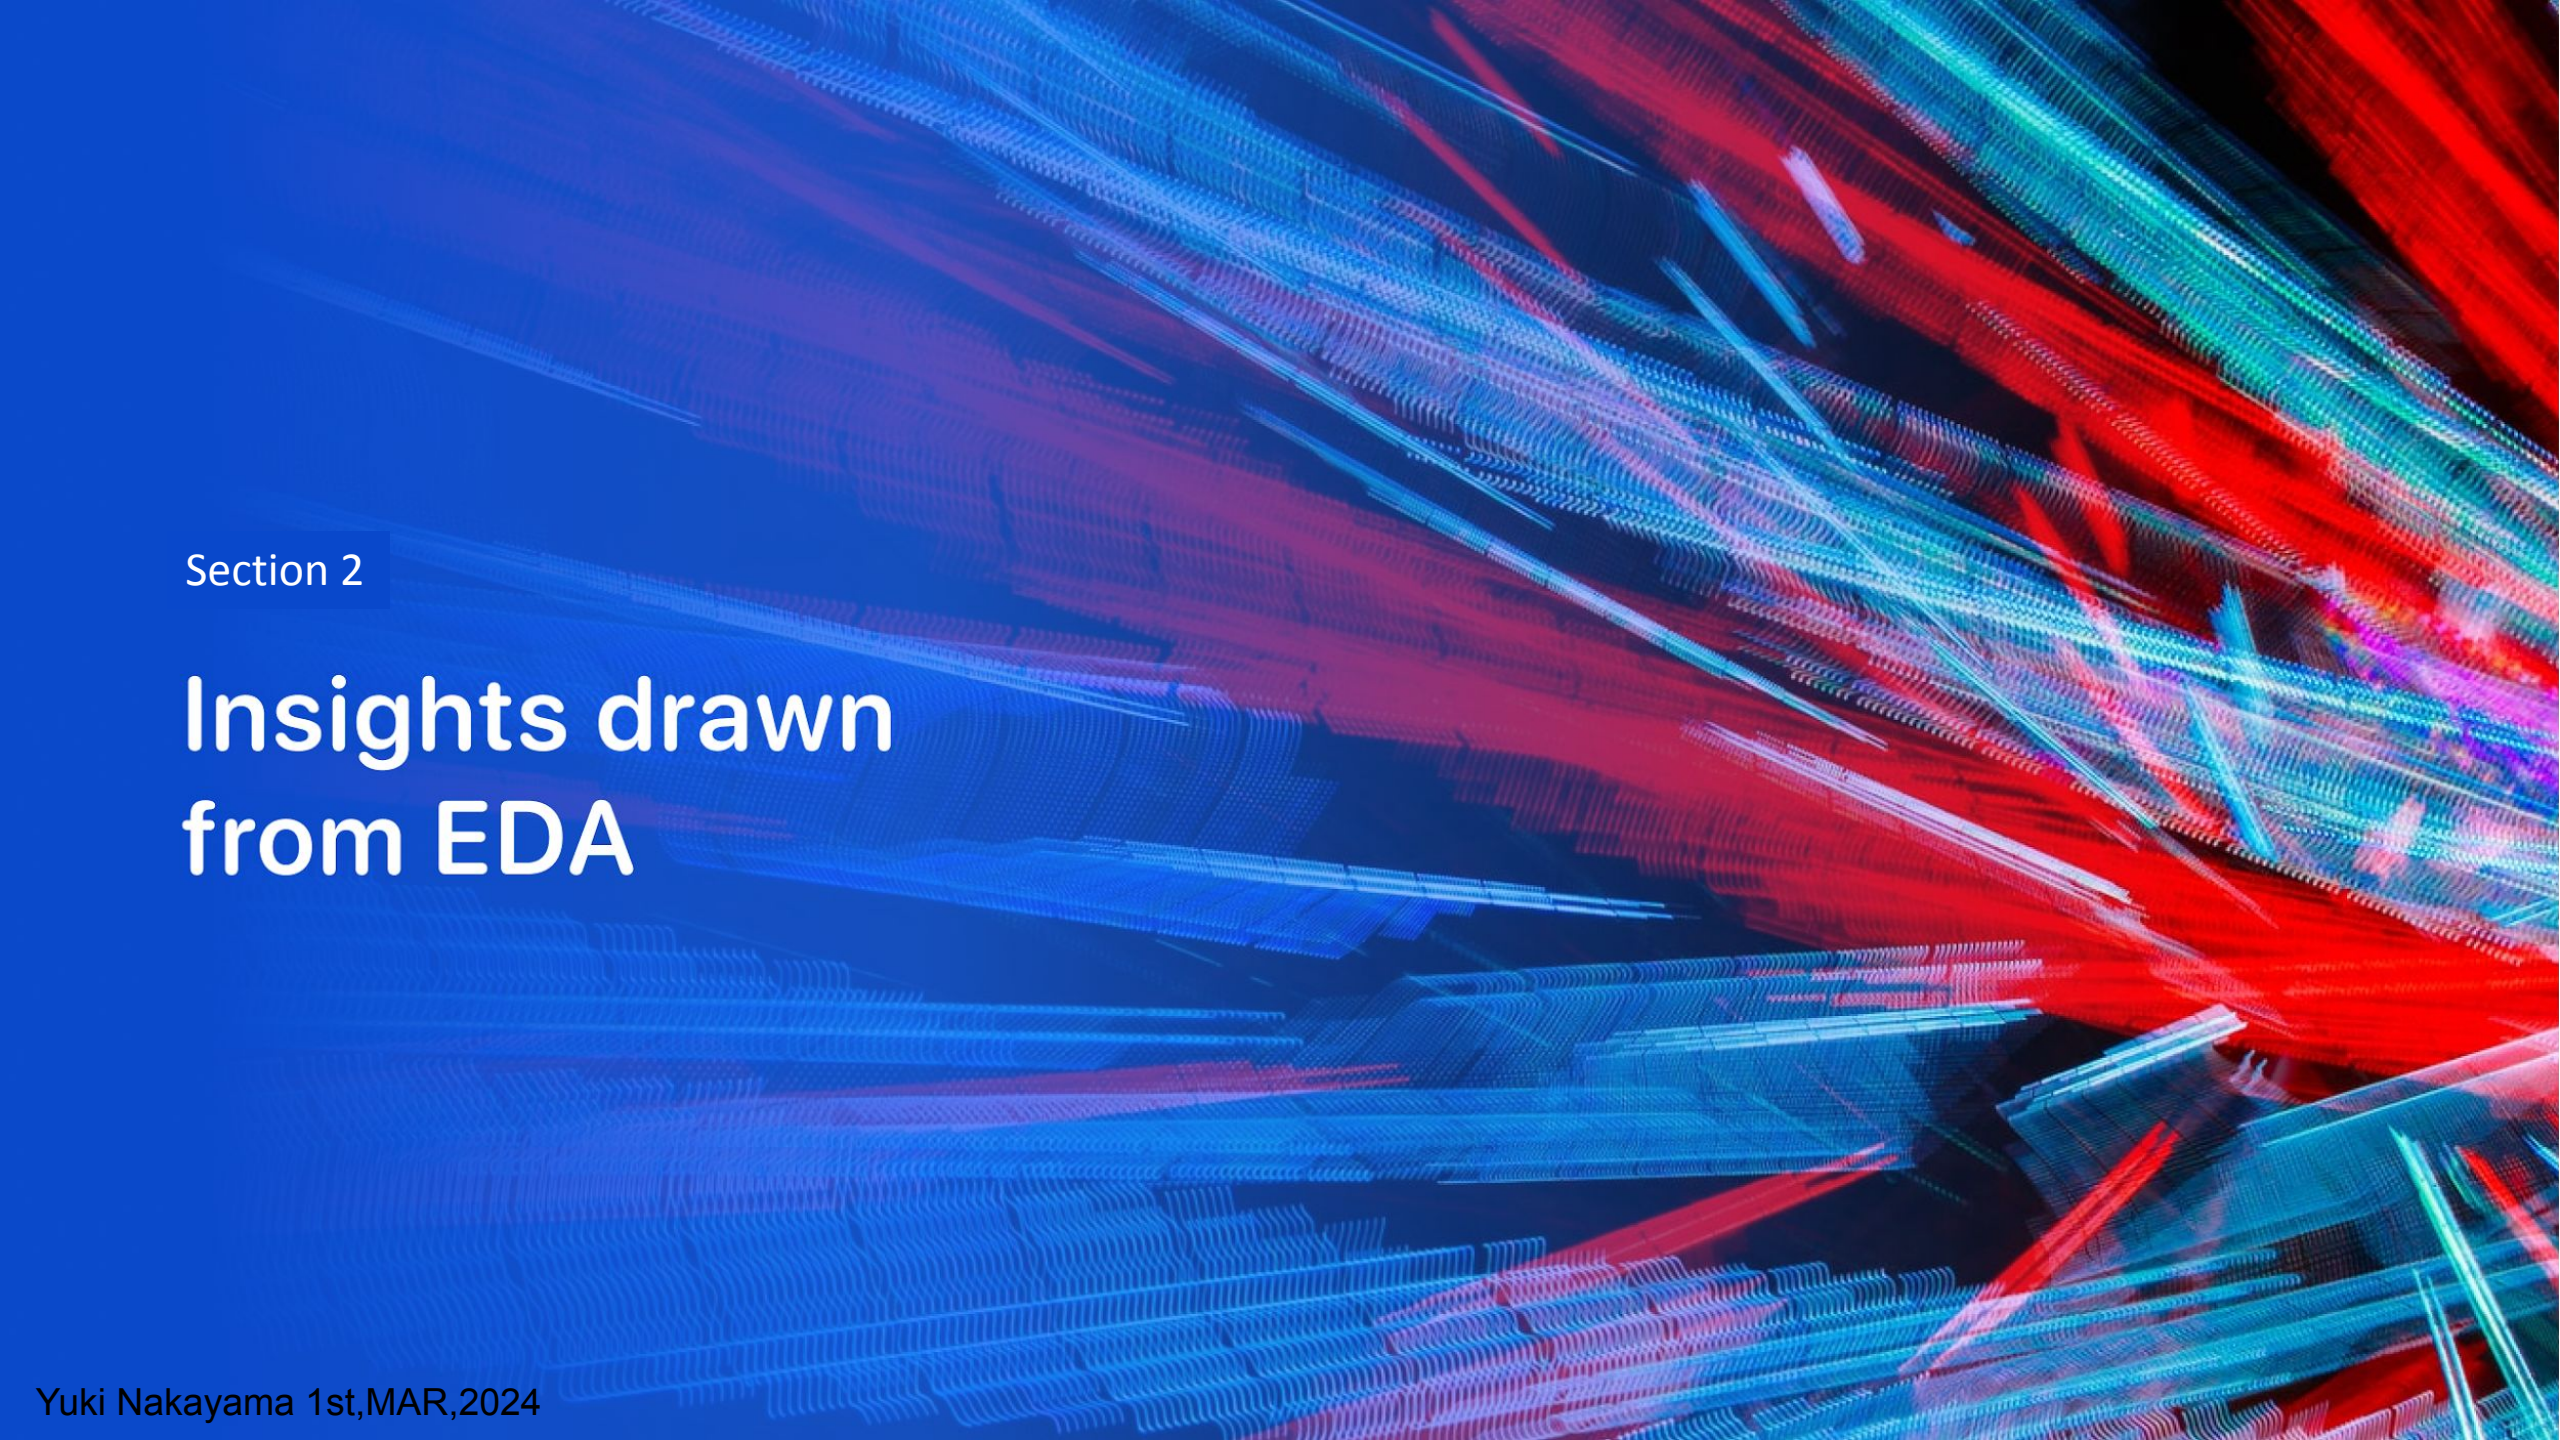
- Summarize what plots/graphs and interactions you have added to a dashboard
- Explain why you added those plots and interactions
- Add the GitHub URL of your completed Plotly Dash lab, as an external reference and peer-review purpose

Predictive Analysis (Classification)

- Summarize how you built, evaluated, improved, and found the best performing classification model
- You need present your model development process using key phrases and flowchart
- Add the GitHub URL of your completed predictive analysis lab, as an external reference and peer-review purpose

Results

- Exploratory data analysis results
- Interactive analytics demo in screenshots
- Predictive analysis results



Section 2

Insights drawn from EDA

Yuki Nakayama 1st,MAR,2024

Flight Number vs. Launch Site

- Show a scatter plot of Flight Number vs. Launch Site

- Show the screenshot of the scatter plot with explanations

Payload vs. Launch Site

- Show a scatter plot of Payload vs. Launch Site

- Show the screenshot of the scatter plot with explanations

Success Rate vs. Orbit Type

- Show a bar chart for the success rate of each orbit type

- Show the screenshot of the scatter plot with explanations

Flight Number vs. Orbit Type

- Show a scatter point of Flight number vs. Orbit type

- Show the screenshot of the scatter plot with explanations

Payload vs. Orbit Type

- Show a scatter point of payload vs. orbit type

- Show the screenshot of the scatter plot with explanations

Launch Success Yearly Trend

- Show a line chart of yearly average success rate

- Show the screenshot of the scatter plot with explanations

All Launch Site Names

- Find the names of the unique launch sites
- Present your query result with a short explanation here

Launch Site Names Begin with 'CCA'

- Find 5 records where launch sites begin with `CCA`
- Present your query result with a short explanation here

Total Payload Mass

- Calculate the total payload carried by boosters from NASA
- Present your query result with a short explanation here

Average Payload Mass by F9 v1.1

- Calculate the average payload mass carried by booster version F9 v1.1
- Present your query result with a short explanation here

First Successful Ground Landing Date

- Find the dates of the first successful landing outcome on ground pad
- Present your query result with a short explanation here

Successful Drone Ship Landing with Payload between 4000 and 6000

- List the names of boosters which have successfully landed on drone ship and had payload mass greater than 4000 but less than 6000

- Present your query result with a short explanation here

Total Number of Successful and Failure Mission Outcomes

- Calculate the total number of successful and failure mission outcomes
- Present your query result with a short explanation here

Boosters Carried Maximum Payload

- List the names of the booster which have carried the maximum payload mass
- Present your query result with a short explanation here

2015 Launch Records

- List the failed landing_outcomes in drone ship, their booster versions, and launch site names for in year 2015

- Present your query result with a short explanation here

Rank Landing Outcomes Between 2010-06-04 and 2017-03-20

- Rank the count of landing outcomes (such as Failure (drone ship) or Success (ground pad)) between the date 2010-06-04 and 2017-03-20, in descending order

- Present your query result with a short explanation here

Section 3

Launch Sites Proximities Analysis

Yuki Nakayama 1st,MAR,2024

<Folium Map Screenshot 1>

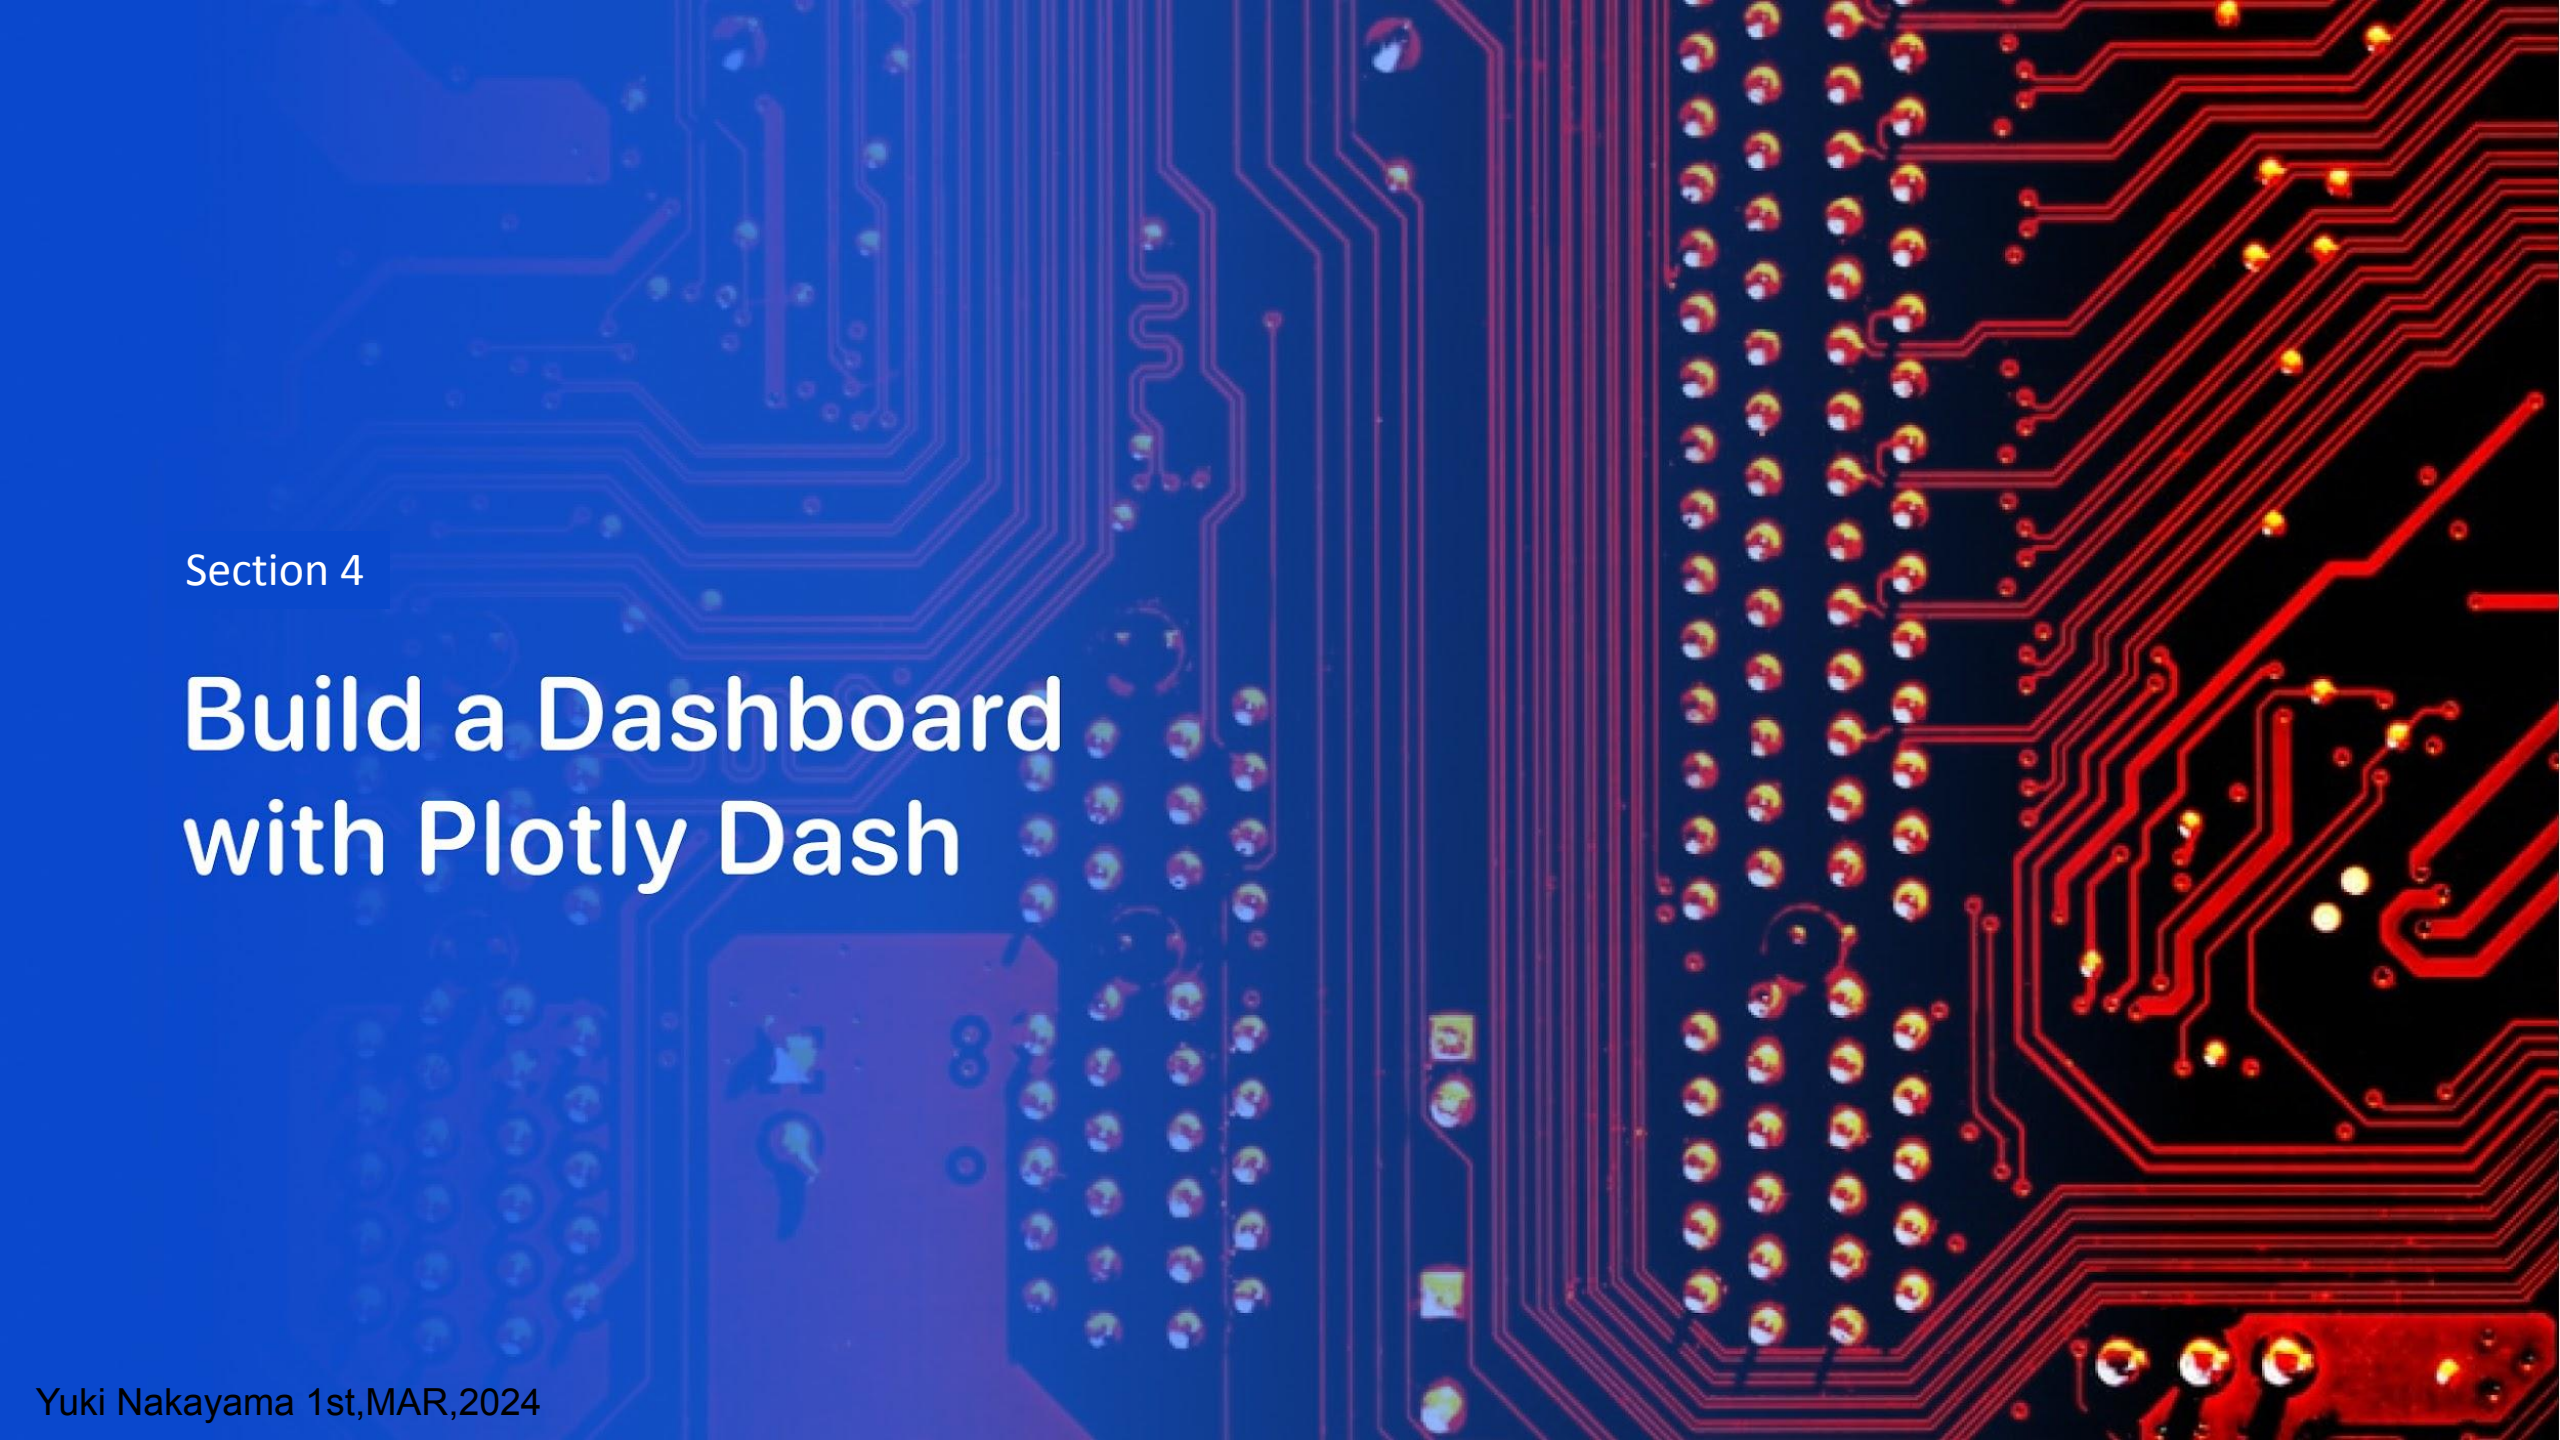
- Replace <Folium map screenshot 1> title with an appropriate title
- Explore the generated folium map and make a proper screenshot to include all launch sites' location markers on a global map
- Explain the important elements and findings on the screenshot

<Folium Map Screenshot 2>

- Replace <Folium map screenshot 2> title with an appropriate title
- Explore the folium map and make a proper screenshot to show the color-labeled launch outcomes on the map
- Explain the important elements and findings on the screenshot

<Folium Map Screenshot 3>

- Replace <Folium map screenshot 3> title with an appropriate title
- Explore the generated folium map and show the screenshot of a selected launch site to its proximities such as railway, highway, coastline, with distance calculated and displayed
- Explain the important elements and findings on the screenshot



Section 4

Build a Dashboard with Plotly Dash

Yuki Nakayama 1st,MAR,2024

<Dashboard Screenshot 1>

- Replace <Dashboard screenshot 1> title with an appropriate title
- Show the screenshot of launch success count for all sites, in a piechart
- Explain the important elements and findings on the screenshot

<Dashboard Screenshot 2>

- Replace <Dashboard screenshot 2> title with an appropriate title
- Show the screenshot of the piechart for the launch site with highest launch success ratio
- Explain the important elements and findings on the screenshot

<Dashboard Screenshot 3>

- Replace <Dashboard screenshot 3> title with an appropriate title
- Show screenshots of Payload vs. Launch Outcome scatter plot for all sites, with different payload selected in the range slider
- Explain the important elements and findings on the screenshot, such as which payload range or booster version have the largest success rate, etc.

Section 5

Predictive Analysis (Classification)

Yuki Nakayama 1st,MAR,2024

Classification Accuracy

- Visualize the built model accuracy for all built classification models, in a bar chart

- Find which model has the highest classification accuracy

Confusion Matrix

- Show the confusion matrix of the best performing model with an explanation

Conclusions

- Point 1
- Point 2
- Point 3
- Point 4
- …

Appendix

- Include any relevant assets like Python code snippets, SQL queries, charts, Notebook outputs, or data sets that you may have created during this project

Thank you!

Yuki Nakayama 1st,MAR,2024
